**AGENDA ITEM**  
**Idaho Park and Recreation Quarterly Meeting**  
**December 1, 2021**  
**IDPR Headquarters**  
**5657 Warm Springs Ave.**  
**Boise, ID 83716**

**AGENDA ITEM: Agreement for Recreation Shared Stewardship with USFS**

**ACTION REQUIRED: None/Information Only**

**PRESENTER: Troy Elmore**

**PRESENTATION**

**BACKGROUND INFORMATION:** IDPR met with U.S. Forest Service Region 1 and Region 4 on December 17<sup>th</sup> via zoom. The meeting was a general meet and greet requested by the respective Forest Supervisors to meet Director Buxton. USFS recreation, legislative, and communications staff were also present. Susan, Craig, and I attended on behalf of IDPR.

They discussed the anticipated funding coming to them from the bi-partisan infrastructure bill. There are still many unknowns, but in general they would like to partner with IDPR and other agencies in hopes that it might streamline the process of getting the funding on the ground to provide recreation opportunities to Idahoans and its visitors.

The USFS has been working on entering into a shared stewardship agreement between themselves, the State of Nevada, BLM, and the U.S. Fish and Wildlife Service. This is the first agreement of its kind. They asked if our agency would be interested in working on a similar instrument for Idaho. I have attached the draft document that I referenced regarding the State of Nevada. IDPR expressed interest in partnering with the USFS on the project and shared that we look forward to exploring all creative ways in which we might be able to leverage resources and better serve our recreating public.

**STAFF RECOMMENDATIONS:** Please share any thoughts or concerns you have about the project.

## **Whereas:**

- Federal agencies, including the Bureau of Land Management, National Park Service, and U.S. Fish and Wildlife Service under the Department of the Interior, as well as the USDA Forest Service, manage 87% of Nevada's lands.
- Participation in outdoor recreation has been growing nationally. The COVID-19 pandemic magnified that increase and generated new and more diverse participation, creating a unique opportunity to encourage stewardship of our public lands, and protect and enhance outdoor recreation opportunities.
- Outdoor recreation is a \$4 billion industry in Nevada, and much of that economic activity is dependent on healthy, resilient public lands. Many rural and gateway communities in Nevada seek to enhance sustainable outdoor recreation-based tourism to diversify their economies.
- Access to outdoor recreation is linked to improved public health outcomes. Federal and state partners can help to address social determinants of health by increasing access for people of all backgrounds and abilities and partnering with health and wellness stakeholders to determine shared values and common goals, build relationships, and generate innovative partnerships to fulfill shared visions.
- Federal and state agencies face limited resources and staffing, contributing to deferred maintenance backlogs, lack of capacity for planning, limitations on developing new infrastructure and a lack of onsite personnel to educate, interpret and, when necessary, enforce. These limitations negatively affect the visitor experience, natural and cultural resources, and potential economic benefits from outdoor recreation.

- Wildfire directly threatens recreation infrastructure and impacts visitor experience through closures or smoke impacts. Conversely, outdoor recreation activities can contribute to unwanted fire, such as from abandoned or escaped campfires, recreational shooting, cigarette smoking, and vehicle use. Wildfire risk also relates to outdoor recreation in terms of responsible development of outdoor recreation gateway communities. Recreation is one of the shared values identified in the Nevada Shared Stewardship Agreement for wildfire risk reduction signed in November 2019.
- The supply of and demand for outdoor recreation is sensitive to climate change indirectly through climate effects on ecological conditions and settings, and directly through changes in temperature and precipitation patterns. For instance, hotter temperatures and extended drought conditions can reduce or eliminate recreation opportunities, create safety concerns and alter visitation dynamics. Planning for sustainable outdoor recreation should include mitigating the contribution of activities and infrastructure to climate change when possible, as well as adapting to predicted changes.
- Equitable and inclusive access for all Nevada citizens and visitors, including tribal nations, is vital to outdoor recreation sustainability
- Multiple funding opportunities, planning efforts, and partnerships, each with its own focus and limitations, currently support outdoor recreation in Nevada. Coordinating and expanding on these is essential to achieving sustainability.
- Public access to important outdoor recreation opportunities may not always be available or guaranteed, depending on land ownership and land use patterns. Acquisitions, easements, and other means may be necessary to establish or protect access to opportunities or to protect key conservation and recreation lands.
- Media, marketing and other communication about outdoor recreation opportunities influence where, when, and how recreation occurs, which can impact management both positively and negatively. Recreation participants need easy access to high quality, accurate information in order to set their expectations, enhance their safety, and enable them to behave responsibly within the landscape and among other recreation participants. Additionally, meaningful education and engagement can cultivate a stewardship ethic among recreation participants.
- Shared Stewardship is a collaborative approach to federal land management that emphasizes partnering with states, tribes, and other groups to identify joint priorities and to develop cross boundary strategies that make an impact at the right scale. The partners to this agreement seek to apply the Shared Stewardship approach to achieve ecologically, economically and socially sustainable outdoor recreation in Nevada.

**Vision:**

Leveraging the strengths, mission, authorities, and capacity of each signatory agency, the parties will collaboratively plan and manage for sustainable outdoor recreation. For the purposes of this agreement, sustainable outdoor recreation:

- 1) Provides for an array of appropriate, high quality visitor opportunities
- 2) Protects and conserves the natural environment, as well as cultural/historic resources
- 3) Enhances the economies of Nevada communities in a manner that preserves unique aspects of their culture and quality of life

Achieving this vision will require:

- 1) Strong partnerships among agencies, nongovernmental organizations, and communities
- 2) A sufficient, highly skilled and stable workforce
- 3) Creative optimization of funding opportunities

**Mutual Commitments:**

The parties agree to:

- 1) Develop a Strategic Plan for achieving sustainable outdoor recreation in Nevada that will guide the parties' efforts to plan and manage recreation opportunities and resources but not supersede existing agency plans or project planning and implementation. The Plan will contain a brief overview of existing conditions, identify other partners and stakeholders, and set forth desired conditions, goals, objectives and action items. It will be informed by this Agreement, as well as by relevant planning documents that guide recreation and conservation decisions within the state and for the parties to this Agreement. In January of each year, the parties will commence a review of the Plan, report accomplishments, and develop and revise Plan components as needed.
- 2) Integrate the desired conditions, goals, and objectives of the Strategic Plan into relevant future planning documents and administrative initiatives, recognizing that each agency has a unique mission and set of authorities that may influence the degree to which and the manner in which these aims can be incorporated.
- 3) Identify, integrate and expand funding opportunities to support sustainable outdoor recreation. Assess how existing authorities and instruments allow the parties to leverage that funding to support sustainable outdoor recreation and identify additional needs.
- 4) Develop complete, accurate, and collaboratively sourced data sets using state-of-the-art collection and maintenance methods, and develop a plan for data sharing among agencies.
- 5) Create tools to support Nevada communities, including rural and under-resourced communities, in working effectively with state and federal agencies to develop, plan for, and achieve desired conditions for sustainable outdoor recreation and tourism.

- 6) Working with other stakeholders as appropriate, coordinate content for media, social media, marketing and other communications with regard to location, timing, and volume of visitation; responsible recreation messaging, including safety and protection of natural and cultural resources; and fostering a stewardship ethic among recreation participants.
- 7) Implement this agreement through an annual (minimum) meeting of authorized representatives or their designees, and through the existing interagency working group convened by the U.S. Forest Service Nevada Liaison and the Nevada Division of Outdoor Recreation. Voluntary, ad hoc working groups may be established as needed -- for example, to develop the strategic plan.

### **Modifications and Periodic Review of Agreement**

The State, National Park Service, BLM, USFWS, and USFS agree to review this agreement not less than every five (5) years to evaluate the mutual commitments identified and make necessary adjustments as appropriate.

### **Mutual Understanding and Agreement**

It is agreed that this document does not serve as an authorizing tool. The State, National Park Service, BLM, USFWS, Bureau of Reclamation, and USFS will rely on all available authorities and funding to implement priority projects. Specific authorities for actions will be identified prior to project implementation and development.

The parties are bound by all applicable federal, state and local statutes and regulations, and this agreement does not supersede those. If conflicts arise, the parties will evaluate how authorities can best achieve the goals of the individual project.

The parties will protect sacred sites and preserve cultural resources and take all necessary actions to protect data collected from Nevada Tribal Nations.

### **Principal Contacts:**

Primary contacts for the purposes of this agreement will be designated by the Authorized Representative for each agency

### **Authorized Representatives**

By signing below, each party certifies that the individuals listed in this document as representatives of the individual parties are authorized to act in their respective areas for matters related to this Agreement for Recreation Shared Stewardship

***IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the last date written below:***

---

Governor Steve Sisolak, State of Nevada

---

Robert Mergell, Administrator, Nevada Division of State Parks

---

Colin Robertson, Administrator, Nevada Division of Outdoor Recreation

---

Brad R. Crowell, Director, Nevada Department of Conservation and Natural Resources
